PERSONAL STATEMENT

Bachelor of Science in Computer Science student at DMI St. John the Baptist University with interests in software development, mobile application development, cybersecurity and data analytics.

I have developed technical skills through academic studies, independent learning and practical software projects, including frontend development, mobile development and cybersecurity. I am committed to continuous professional development, technical problem-solving and building technology solutions that address practical challenges. My university leadership responsibilities have strengthened my communication, teamwork, organisation and leadership abilities.

KEY COMPETENCIES

Programming: Python, C, C++, Java and JavaScript

Web Development: HTML, CSS, React and TypeScript

Mobile Development: Flutter and Dart

Database Management: SQL fundamentals and DBMS concepts

Cybersecurity: Introductory cybersecurity, suspicious SMS and URL analysis, security-focused application development

Data Analytics: Excel fundamentals and introductory data analysis

Development Tools: Visual Studio Code, Android Studio, Git and GitHub

Operating Systems: Windows, Ubuntu Linux and Kali Linux

Virtualisation: VirtualBox

Professional Skills: Communication, leadership, teamwork, problem-solving, technical documentation, time management and organisation

LEADERSHIP EXPERIENCE

DMI St. John the Baptist University *April 2026 – Present*

Science and Engineering Communication Officer

- Support communication activities within the Science and Engineering community.
- Assist with sharing academic and university information.
- Contribute to communication initiatives.

DMI St. John the Baptist University *2025 – Present*

Class Representative, Bachelor of Science in Computer Science

- Represent students in class-related matters.
- Facilitate communication between students and academic staff.
- Communicate academic concerns and relevant student information.

EDUCATION

Bachelor of Science in Computer Science *2025 – 2028 (expected)*

DMI St. John the Baptist University, Malawi

- Current level: Second Year, Semester 4.
- Relevant areas: programming, data structures and algorithms, database management, operating systems, discrete mathematics and software development.

PROJECTS

ScamShield Africa *In Development*

Flutter and Dart | Cybersecurity and Mobile Application Development

An Android cybersecurity application designed to help users identify suspicious SMS messages and URLs. Project areas include rules-based detection, suspicious URL analysis, offline operation, privacy considerations, requirements documentation and threat modelling.

Personal Portfolio Website *In Development*

HTML, CSS and JavaScript

A personal website presenting academic background, technical competencies, professional experience and software development projects. alfredbanda.pages.dev

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Professional Certificate in Data Analytics, Orbal Digital Academy (2026)
- Cisco Introduction to Cybersecurity (in progress)
- Basics of Python
- Data Science
- Machine Learning Algorithms

PROFESSIONAL INTERESTS

Software Engineering • Frontend Development • Mobile Application Development • Cybersecurity • Data Analytics • Artificial Intelligence and Machine Learning • Database Management • Project Management • Technology Innovation
